PROJECTS EXPERIANCE

Teledaktar
https://teledaktar.com
Teledaktar is a health-based application offering a variety of services designed to cater to diverse healthcare needs. Key features include:
- Appointment Booking
- Ask a Doctor
- Discount Facility
- Health Packages
- Corporate Health Services
- Audio Call and Video Call consultations

These services aim to provide comprehensive and accessible healthcare solutions to users.

Daktarbhai
https://daktarbhai.com
Daktarbhai is a health-focused application built with a microservices infrastructure, ensuring scalability and flexibility. It offers a variety of interconnected services, including:
- Personal Health Records
- Appointment Booking
- Ask a Doctor feature

- Hospital Discounts
- Health Package Subscriptions
- Sample Collection
- Senior Citizen Follow-up

Additionally, Daktarbhai integrates specialized applications and services such as an Agent App for representatives, Corporate Services for businesses, and a Helpdesk for user support. The application also features a Banglalink charging system for the renewal process, catering to Banglalink-subscribed users. Banglalink is a key partner of Daktarbhai. This comprehensive suite of interconnected applications caters to diverse healthcare needs, providing a robust and agile healthcare solution.

Bangladesh Hi-Tech Park Authority (One-Stop Service)

https://ossbhtpa.gov.bd

This one-stop service project, developed with the Laravel framework, offers a comprehensive range of services, including:
- Project registration
- Project clearance
- Space allotment
- Land allotment
- Work permits
- Visa assistance
- Visa recommendations

Bangladesh Economic Zones Authority (One-Stop Service)

https://oss.beza.gov.bd

I was part of a team that worked on this project. In the project clearance module, users can complete the entire application process for obtaining clearance from BEZA online. Additionally, expatriates can utilize the visa assistance module to apply for temporary visas through the BEZA authority. Furthermore, individual modules such as Import Permits, Export Permits, Bank Payments, and Bill Generation serve specific purposes within the system.

Travel Agency Management System for the Ministry of Civil Aviation and Tourism

As a member of the Development team at Business Automation Ltd., I contributed to all the functional modules of this application, including:
- Agency: for agency management
- Registration: for managing new agency registrations
- Renew: for handling the renewal of expired agency registrations
- Office Change: for managing office change requests
- Cancel: for processing agency cancellation requests
- Complain: for users to register complaints about their issues.

My involvement spanned across the development and implementation of each of these modules.

Inventory Management System

https://inventory.batworld.com

As a member of the Development team at Business Automation Ltd., I contributed to various functionalities in this project, including item purchase, requisition, user and project-wise requisition, desk-to-desk requisition processing, and item returns.

Bangladesh Investment Development Authority (One-Stop Service)

https://bidaquickserv.org

The project, built on the Laravel framework, serves as a one-stop service platform. It offers a range of services including Basic Information, Visa Recommendations, Office Change, Work Permits, and more, streamlining administrative processes for users.
